

Yajilin

Midterm information: Construct a logic puzzle, due 2/26 11:59 PM. Details at

<https://tinyurl.com/logicpuzzlestucomidterm>

Announcement: Next class, 2/27, we will be solving each others' puzzles! Class will end at 7:35 PM instead of 7:50 PM.

Yajilin rules: Shade some cells in the grid, and draw a single non-crossing loop through all remaining cells.

- Shaded cells cannot be adjacent horizontally/vertically.
- Gray cells cannot be shaded, and are not part of the loop.
- A gray cell with a number indicates how many shaded cells are in the given direction (and sees through other gray cells).

Example Note that not all shaded cells need to be clued.

Puzzle 1 (by Kaz)

Techniques with large clues

For any region, the loop enters it some number of times, and exits it the same number of times. Therefore the number of entrances into a region must be even!
